

Coordination Assistance Program

YOUR OWN COORDINATOR

Get someone you can count on without hiring, training, or managing staff. A professional transportation coordinator will handle the day-to-day management and administration of your transportation operations.

CUTTING EDGE TECHNOLOGY

Get the benefits of the latest routing and digital mapping technologies without the costly investment and need to operate complex student transportation software.

INFORMATION AT YOUR FINGERTIPS

Know your bus routes, student bus schedules, system metrics, and financial data are accurate and always ready to use.

- **Focus on education**
while knowing your transportation system is running safely and efficiently.
- **Save money**
by eliminating the need to use in-house resources for managing transportation.
- **Increase control and improve safety**
with the help of a professional transportation coordinator.
- **Increase productivity**
by freeing your staff of student transportation responsibilities.

Allowing you to focus on educating students rather than transporting them is the mission of EarthSpec's Coordination Assistance Program. It's a unique way to bring you the benefits of a professional student transportation office without the hassle or expense.

Our professional student transportation coordinators handle all of the administrative aspects of transporting your students; including the daily activities of assigning students to busses, issuing bus passes, and maintaining routing applications. We work closely with your school district, and bus drivers or contractors,

on a daily basis to ensure your system is operating in accordance with your district policies and state requirements. Most importantly, you will know you are always operating a safe and efficient transportation system.

By utilizing our coordination services you also know that your contractors or bus drivers are driving the most cost-effective and efficient routes; reducing mileage and minimizing student ride times. Once and for all, you gain control, and remain in control, of student transportation.

Here's how it works...

We handle all of your student transportation coordination on a daily basis. We perform all of your bus routing and manage your student schedules, transportation data, and operational efficiency. When it's time to transition the system from one year to the next, we do it all – including bus passes. All you provide is the list of your student enrollment.

Our proven methods and standardized procedures make this a seamless integration into your school district. By working closely with your school secretary, guidance

counselors, or admissions office, we establish and maintain an optimal student transportation system. You are always in control and have instant access to accurate, up-to-date data. Whether you want to visually see your bus routes on a map, need specific student transportation reports, or simply want to look up a student's bus schedule, it's there for you.

“Our three schools cannot say enough good things about how pleased they are with EarthSpec. The district experienced a significant decrease in workload for school personnel while gaining increased control of their transportation routes. The district is pleased to be able to continue the relationship for another school year and would heartily recommend EarthSpec to any other school district.”

Christina Sharkey
Business Administrator
Great Meadows Regional, NJ

- Fleet Management

SAFETY FIRST

Our program places safety as the number 1 priority. Our multi-layered system of checks and balances brings all participants together for the safety of your students.

PARENTS AND THE SCHOOL COMMUNITY

Anyone who has handled student transportation knows that communication with parents and the school community is essential and often challenging. Our program gives you the tools you need to effectively provide excellent “customer service” while leaving you in control.
